Education

University of Houston, B.S. Computer Science, GPA: 3.71

Expected Dec 2026

Skills

Programming Languages: TypeScript, Python, C#, JavaScript, HTML, CSS, SQL

Technologies: React, FastAPI, .NET, Express.js

Tools: AWS, Terraform, Docker, Git, GitHub Actions, Linux

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Work Experience

IT Intern, KIPP Texas Public Schools

May 2025 - June 2025

- Maintained and patched 3,000+ client systems, supporting large-scale device reliability
- Supported asset inventory and Linux-based system administration tooling; increasing device visibility by 50%
- Bridged tech troubleshooting and communication, resolving IT issues while ensuring user-friendly support

Tech Consulting Intern, PwC

June 2024 - July 2024

- Analyzed user data and evaluated AI platform performance with Python and Power BI tools
- Delivered insights that helped accelerate MVP delivery by 2 weeks by identifying teamwork bottlenecks

Project Experience

CougarCS Talent-Sourcing Portal – WIP

June 2026 – Present

- Developing a full-stack talent sourcing platform using React, TypeScript, Express.js, and Cloudflare Workers to help professional recruiters discover candidates from the UH CougarCS community.
- implemented highly parameterized search system with filters for technical skills, graduation date, work auth, experience, and other candidate attributes, providing recruiting workflow similar to LinkedIn Recruiter.

Volunteering Website - volunteer-website-39e.web.app

Aug 2025 - Dec 2025

- Led 4-person Agile team to build full-stack geospatial event-matching volunteering platform
- Built React + TypeScript frontend and FastAPI + PostgreSQL + S3 backend with geocoding PostGIS integration
- Achieved 80% test coverage with Dockerized unit and integration tests, speeding development by 30%

AI EMS Vehicle Routing - github.com/COSC4368-Group-1/traffic-project

Sept 2025 - Dec 2025

- Built ML pipeline (PyTorch MLP + GNN) for emergency vehicle routing optimization
- Generated dynamic synthetic traffic data (SUMO, OpenStreetMap); achieved 90%+ route accuracy

Package Manager - Data Hackfest Hackathon - linktr.ee/rtrevizo18

July 2025

- Developed full-stack React + Express.js web app with local SQLite and cloud MongoDB synchronization
- Designed backend data consistency layer for cross-environment persistence, seamless cloud/local support

Leadership Experience

Director of Corporate Relations, CougarCS

Dec 2025 - Present

- Built partnerships with 20+ companies, creating opportunities for 100+ students
- Organized recruiting events, workshops, and sponsorship initiatives with measurable engagement outcomes

Computer Science Tutor, CougarCS

Sept 2025 - Present

- Tutor 15+ students in data structures, algorithms, and debugging strategies in Python, JavaScript, and C++

Awards

KIPP Rales Full-Ride Scholarship - 1 of 30 selected from over 4,000 candidates

March 2022
